Take it to the top of the world  
Take it to the top of the world  
I was lost in the dark nobody hearing me  
Now I'm up in the sky I found my remedy

Take it to the top of the world  
Take it to the top of the world  
To the end from the start  
I know that you agree  
Now we up in the sky  
We found the remedy

Take a day at a time enjoy the sounds by the red-light  
Better to get there safe than get ahead life  
Living a dream with the headlights  
And I just do it up top my name should-a been air nikes  
Now they all looking where did the vibe go  
Bringing it back you should be calling me Bob Hope  
Without the acting music satisfaction  
This is feel good real good make it happen  
I used to play 'em my song my heart aching  
But never forsaking speed I'm never breaking  
For us to make history it's unusual  
But dude so I carry on what I'm used to do  
Time pass but the memory will last  
So celebrate your future reminiscing yo past  
To reach for the moon it's true I gotta blast  
But I took it to the tip of the top I stand fast

Take it to the top of the world  
Take it to the top of the world  
I was lost in the dark nobody hearing me  
Now I'm up in the sky I found my remedy

Take it to the top of the world  
Take it to the top of the world  
To the end from the start  
I know that you agree  
Now we up in the sky  
We found the remedy

Think I found my remedy  
I had to change ways put the negative aside today and  
so  
Think I found my remedy  
I had to change ways put the negative aside today we  
gotta change

Best believe yo I think I found the key  
No enemies around I'm free and that's my remedy  
Out with the negative positive to retrieve  
Sometimes you gotta push it away gotta believe  
Beyond doubt, far away from the hate  
To become great I need a piece of mind to create  
So I stand tall, I figured I gain weight  
Everybody talk but I'm not into no debate  
Action 'cause talk is cheap  
I wanna speak to you straight I ain't tryna be deep  
Take a leap and find out we unique  
To show that you're positive, it's not a sign of showing  
you're weak  
Holding on to what matter the most  
Not the money, can't take it with you when becoming a  
ghost  
So I don't wanna hear the brag and boast  
I just wanna say welcome to the life and tonight I'm  
your host

Take it to the top of the world  
Take it to the top of the world  
I was lost in the dark nobody hearing me  
Now I'm up in the sky I found my remedy

Take it to the top of the world  
Take it to the top of the world  
To the end from the start  
I know that you agree  
Now we up in the sky  
We found the remedy

If everything's apart of we  
Then why do we feel alone  
If we agree to disagree  
'Cause I never lost my hope  
Even with nowhere to go on a lonely road  
So I'm singing

Take it to the top of the world  
Take it to the top of the world  
I was lost in the dark nobody hearing me  
Now I'm up in the sky I found my remedy

Take it to the top of the world  
Take it to the top of the world  
To the end from the start  
I know that you agree  
Now we up in the sky  
We found the remedy

Think I found my remedy  
I had to change ways put the negative aside today and  
so  
Think I found my remedy  
I had to change ways put the negative aside today we  
gotta change  
Think I found my remedy  
I had to change ways put the negative aside today and  
so  
Think I found my remedy  
I had to change ways put the negative aside today we  
gotta change
