

## **Juliana Down "Empires"**

Visit "[Empires](#)" on [MotoLyrics.com](http://MotoLyrics.com)

In my heart and through my veins  
The tiny blueprint remains  
Chemicals and history  
Brought together you and me

For the rapture and the pain  
Destiny, make us the same  
Now the start, now you'll see  
You're the only one for me

We're all incomplete Halflings  
Searching out our perfection  
Just enough to fall undone  
Come together now we are one

Could it be that love knows?  
Could it be Empires?  
Are rising, rising  
Deep down inside of me

Could it be that Love sees?  
The only reason I breathe  
Empires  
Are rising deep inside of me

Just the beat of my heart  
Just a second apart  
Just a chance to declare  
I will always be there

We're all incomplete Halflings  
Two by two we're checking in  
Just enough to fall undone  
Come together now we are one

Could it be that love knows?  
Could it be Empires?  
Are rising, rising  
Deep down inside of me

Could it be that Love sees?  
The only reason I breathe

Empires  
Are rising inside of us

Could it be that love knows?  
Could it be Empires?  
Are rising, rising  
Deep down inside of me

Could it be that Love sees?  
The only reason I breathe  
Empires Are rising

Inside of us  
Inside of us  
Empires

For the rapture and the pain  
Destiny, make us the same  
Now the start, now you'll see  
You're the only one for me

Could it be that love knows?  
Could it be Empires?  
Are rising, rising  
Deep down inside of me

Could it be that Love sees?  
The only reason I breathe

Empires are rising , they're rising  
Empires are rising they're rising  
Empires are rising, they're rising  
Empires are rising, they're rising  
Inside of us
