I wonder, wondering all around this big place I live  
She was scared to go outside when it once felt so  
nice...to me

Picked up a smoke then you drag a little  
I wanna choke so you won't belittle  
Everyone knows that you do over and over over and  
over again

Your pretty wont you come play with me  
This time I be nice  
You can't trust what I say to you  
I know there all lies  
Do you?

And if you ever had to  
I would be going strong  
What in the world was happening?  
Dear can't I be wrong?

Picked up a smoke then you drag a little  
I wanna choke so you won't belittle

Everyone knows that she'll do over and over over and  
over again
