Gotta gotta get out alive
To know just once what its like to have my own breath
and we know its no use
to pretend that theres another way
way to go about this you know

we can drive far away
we can forget the way back
we can start over
we could drive far away
we can forget the way back
we can start over

we stood on top for awhile your bad ideas
you know that this is serious
and im not alone
its no use to pretend
that theres another way to go about this
you know

we can drive far away
we can forget the way back
we can start over
we could drive far away
we can forget the way back
we can start over

all thats is gone is in the ground
reach for the surface
all thats good is in the ground buried below us

we can drive far away
we can forget the way back
we can start over
we could drive far away
we can forget the way back
we can start over
