"She's So Tired"

Visit "[She's So Tired](#)" on MotoLyrics.com

Pick it up slow
You pick up what you know
And what you don't know
Does make your heart go along
Let me go now
Or let me float upon
The board that we found
We've been looking on

We are out of sight
We don't need to hide
There's no need to fight
The streets are full of light
And you just pass me by
I cannot see the sky

The things I can't tell
Just like the words I can't spell
It rings like a bell
In my little head
Oh say what is on just say what is on
And don't let me fade
Unless I am done

We are out of sight
We don't need to hide
There's no need to fight
The streets are full of light
And you just pass me by
I cannot see the sky

And while she sees me

I'm falling away from where we go
From her eyes now I can't tell
What makes her I'll in that way

And we are out of sight
And we don't need to hide
And there's no need to fight
The streets are full of light

And you just pass me by
I cannot see the sky
It's your way to say goodbye
And we are out of sight
And we don't need to hide
And there's no need to fight
The streets are full of light
And you just pass me by
I cannot see the sky
It's your way to say goodbye
We are out of sight
And we don't need to hide
There's no need to fight
The streets are full of light
And you just pass me by
I cannot see the sky
It's your way to say goodbye
