see me as I am on my own not trying to find you
no more crying lying next to you

Chorus:
any way you can
any way you can
just hand
take my
big bossman

winter summer fall passes us by both you and I
out of fashion passion stars in the night

chorus x 2

sitting in picture still all is calm all is bright
sunshine kissing me watch it and see
you'll get it right

chorus

any way any way you any way you can... big bossman
any way any way you any way you can
