So long ago you promised me
A love to last eternally
Now I sense the need to reaffirm
That my heart remains your prime concern

Do you still dream about me
Tell me deep in the night when you're holding me tight
Is it like it used to be
Do you still dream about me
When I whisper your name does it thrill you the same

How well I remember the first day we met
You said I had a smile you never would forget
I was the apple of your eye, the sunshine of your day
And the way you made me feel, just took my breath
away

We loved so long, sometimes I had to wonder if
passion flow lives on
Please let me know, exactly what you're feeling when
the lights are low

Do you still dream about me
Tell me deep in the night when you're holding me tight
Is it like it used to be
Do you still dream about me
When I whisper your name does it thrill you the same

Time has a way of bringing on change (tell it)
Sometimes we don't understand why things can't stay
the same
Some loves just grow and grow, while others grow
apart
I want to know once I grow old, what side of love you'r
on (I need to know it).

We swore to love, cherish and obey, whatever come
what may
We made a vow, baby that was then, I talking hear and
now

Do you-oh do you dream about me
Tell me deeo in the night when you're holding me tight
Is it like it used to be
Do you still dream about me
When I whisper your name, does it thrill you the same.

I can't speak for you, only for myself
And I'll tell you now there's no way or how
Can't nobody's love can thrill me half as much
While I need to know, baby tell me so, is it only me
staring in your dream, am I still your fantasy.

Do you still dream about me
Tell me deep in the night, when you're holding me tight
Is it like it used to be
Do you still dream about me
When I whisper your name, does it thrill you the same
