baby i am here
baby i am here

never thought that in a million years
never thought that you would come to me
you're the answers to a million prayers.
you're the apple of my eye.

i can hear you breathing next to me.
just how lucky can one person be?
i am looking at a mystery
everything i dream, more than i can wish for.

starlight starbright, all day all night
i will be right next to you.
here forever, i will never leave, i will never leave.

baby you're my little ray of light
i could find you in the darkest nights
if you cry then i will hold you tight
never letting go, i would do that for you.

starlight starbright, all day all night
i will be right next to you.
here forever, i will never leave, i will never leave.

baby i am here
baby i am here

starlight starbright, all day all night
i will be right next to you.
here forever, i will never leave, i will never leave.
