

## La Strada "Go Forward"

Visit "[Go Forward](#)" on MotoLyrics.com

Go forward  
Go forward my love  
I know you're afraid  
Of this cold world

The sun is shining high  
You take it to the fore  
You threw out your old life  
You couldn't give more

These words aren't worth their salt without love  
In the city below the forest I find the dove  
It's never been this rough  
I've never been so poor  
It's never been this real  
I cut the final chord

The sun is shining high  
You take it to the fore  
You threw out your old life  
You couldn't give more
