This country's seen some hard times, lord knows she's  
deep in debt.  
She's comin' through another depression and for some  
it ain't over yet.  
We've all been divided, playin' our own selfish games.  
Why does it always take the hard times to get people  
back together  
again.  
But I believe in America, I believe in America...  
One nation under God, still proud and strong!  
I believe in America, I'm proud to be in America,  
Though I know in America we've gotta right some  
wrongs.  
But I don't believe you can keep America down for long.  
Now if you read the papers, or listen to the news these  
days.  
Sometimes there don't look like there's much hope left  
for the good ole  
USA.  
This country she ain't perfect, but thank God she's still  
free.  
An' she's gonna make her comeback, yes sir, just you  
wait and see.  
An' I believe in America, I believe in America...  
One nation under God, still proud and strong!  
I believe in America, I'm proud to be in America,  
Though I know in America we gotta right some wrongs.  
But I don't believe you can keep America down for long.  
I believe in America, I believe in America...  
One nation under God, still proud and strong!  
I believe in America, I'm proud to be in America,  
though I know in America we gotta right some wrongs.  
But I don't believe you can keep America down for long.
