Spit out the poison that plastic motive  
The soothing pain that feeds the hole  
A carnage path of one-time friends  
A stepping stone to personal ends  
Ends

A line that piles high an art of trend  
Champagne delusions, contorts and bends  
The seething mass which consumes deceit  
The frozen glance burn obsolete

All we are in one section  
Struggling blindly through deception  
All we are in one section  
Struggling blindly through deception

Spit out the poison that plastic motive  
The soothing pain that feeds the hole  
A carnage path of one-time friends  
A stepping stone to personal ends

All we are in one section  
Struggling blindly through deception  
All we are in one section  
Struggling blindly through deception
