If I satisfy you, if you satisfy me  
Once the course has been set  
Gonna need all the help I can get but  
You just gotta be you, 'n I just gotta be me  
I can't classify you, you can't pacify me  
We can't make it at all  
You won't even take my calls  
I just want ta be loved  
'N you just gotta be free  
I'll smile and tell it to the world  
You just gotta be

Pardon me for sayin'  
What a price you've been payin'  
What more can I say  
You might feel different some day

If it matter to you, it still matters to me  
You'll find me by the bayou  
Thinkin' wicked thoughts of you  
I just want ta be strong, you just gotta be wrong  
I can't clarify you, you can't verify me  
I can't make it by stealth  
You won't even share the wealth so  
You just gotta be you  
And I just gotta be me  
And I will tell that to the world  
You just gotta be

With a gratified mind, I'll be on the highway  
Just as soon as I can  
Where there's a will there's a way so until then  
I just want ta be me, and you just gotta be
