

## Luther "In Decline"

Bring the battle plan  
We're betrayed again  
On the blackest day for years  
All the warnings tell  
We're in flames again  
& it's the second time we've been

As you kicked me off, off the back of luck  
I'm sinking down  
I'm in decline  
Decline  
Fade out I'm gone  
Fade out, split myself & crawl  
As the beatings slow, from the morning star as I watch  
you take your form  
And the darkness glows  
It's familiar show  
All my time lies down again  
I hold the thought down  
Ignore my insides  
Numb my senses  
All
