Now all a-you young folks, ravin'  
An' hollerin' about how bad you wanna be free  
But let me tell ya what it was like in my day  
For an' old man like me, are you ready?

Take it on, little brother, an' make a way  
I said, take it on little brother, take it further  
Now I had to work, ev'ryday  
On my job, I didn't get much pay

Had to say, 'Yes sir' to the other man  
I was too confused, to understand  
I had to things, yeah, against my will  
If I hadn't looked further, you wouldn't have made it

Take it on, little brother, take it further  
I said take it on, little brother an' make a way  
Now you've got the future, in your hand  
Now don't you be, no lazy man

We laid the ground, an' made the way for you  
Come on an' show us, that you're proud of us  
You have a hard, time to get through  
But keep on pushin', we're right behind you

Take it on, little brother, take it further  
I said take it on, little brother an' make a way

Take it on, little brother, an' make a way  
I said, take it on, little brother, an' take it further

Uh, now I had to work, ev'ryday  
On my job, I didn't get much pay  
Had to say 'yes sir', to other man  
I was too confused, to understand

I had to do things, yeah against my will  
If I hadn't of moved further, you wouldn't have made it  
Take it on, little brother, take it further, yeah, um  
I said take it on, little brother, an' make a way
