Calling me at 4 in the morning,
Just got off the club I know you're tipsy and you want it
Saying everything you wanna hear I got you ?
Sounds like you want three after hours at my home
And my doors are open to you and your girls
If you turn on like that but all I really need is you plus
you
Got me turned up like that
Tell me trying to front like you don't want it
I know all the women love telling that's not tonight
Bet you wanting something when you call me
If you really want to talk come over

If you really wanna come through, tell me baby let me
send a driver for you
But you gotta know exactly what you wanna do
If you don't wanna give it to me baby I'm cool
If you wanna have the time of your life then get on over
here and we can spend the night
I know what you want and what you like
And you already know what I wanna girl so baby
Don't play with it, don't play with it, don't play with it
Don' play with it, baby don't play with it, don't play with
it,
Don't play with it, don't play with it

If you want it you should get it, don't play with your
feelings
Don't wait for not another second or a minute
If I want it then I got it I ain't never had a problem
If you really wanna holler take my hand and follow me

My doors are open to you and your girls
If you turn on like that but all I really need is you plus
you
Got me turned up like that
Don't be ...trying to front like you don't want it
I know all the women love telling that's not tonight
Bet you wanting something when you call me
If you really want to talk come over

If you really wanna come through, tell me baby let me

send a driver for you
But you gotta know exactly what you wanna do

If you don't wanna give it to me baby I'm cool
If you wanna have the time of your life then get on over
here and we can spend the night
I know what you want and what you like
And you already know what I wanna girl so baby
Don't play with it, don't play with it, don't play with it
Don't play with it, baby don't play with it, don't play with
it,
Don't play with it, don't play with it

Bust of us baby, baby I revive them after killing them
Blinding them when I'm incredible shining this the
minimum
Spending money on every bottle then we spillin them
see the type of shit that make me wonder,
...hearing them
Yeah, my make up ? hair, and away ? coming back to
my little crib and I better be leaving ?
Kissing ? feel your lipstick...rubbing on
You kiss it like you really really love it then you're
showing off
Yeas, they get the focusing with every room
Then you watch the swelling get the choking a little bit
Yeah, I understand you seeing something that you
never saw
If you're scared, why you even play with a nigger ?
If you showing that you're liking him then he'll like you
back
Don't know what you doin' and you ? he gonna hit you
back
Just like how I bite the track, now they say they're
scared of us
We ? of us we ain't playing games girl, we're serious

If you really wanna come through, tell me baby let me
send a driver for you
But you gotta know exactly what you wanna do
If you don't wanna give it to me baby I'm cool
If you wanna have the time of your life then get on over
here and we can spend the night
I know what you want and what you like
And you already know what I wanna girl so baby
Don't play with it, don't play with it, don't play with it
Don't play with it, baby don't play with it, don't play with
it,
Don't play with it, don't play with it baby.
