

## 4 Bonjour's Parties "Ruins"

Can you see the small stars?  
Please let them in  
Everlasting winter warm and free her hands

Find me in the ideal  
Leave 'em vanish me  
With the tiny pieces  
Please kill this hate

She is a manic clown  
No one chokes her sigh  
Her pale blue eye has colored just like ruins

Cure his heart with this sound

The fake images made of tears said "Stop falling  
down"  
The silence came from yesterday said "Fly faster than  
light"  
The interstellar obelisk said "Won't you dig up your  
grave?"  
The monologue soaked into my room said "Please stop  
this song"

Cure his heart with this sound
