Never seen the moon before  
shining so bright  
Now I see the future in your eyes  
and it looks alright  
Never heard a song so sweet  
like the one I'm hearing now  
When you're lying here next to me  
the world is filled with laughter  
What I've been after  
Now (now)  
I know (I know)  
I've never been in love before  
Now (now)  
I know (I know)  
I want to feel it more and more  
Like a color that I've never seen  
with a touch I've never felt  
Love used to be a clouded dream  
but now I see it all so well  
I can't wait to live another day  
to wake and see you again  
When I go to sleep I pray  
it's gonna last forever  
We're gonna be together  
It'll never end  
Now (now)  
I know (I know)  
I've never been in love before  
Now (now)  
I know (I know)  
I want to feel it more and more  
Now (now)  
I know (I know)  
I've never been in love before  
Oh, now (now)  
I know (I know)  
I want to feel it more and more
