Sick of turning on the tube and finding nothings right
Whats going on
People are dying, sex is selling and we're the slut
We get used then what?
This fuckin war has been going on for far to long
(Why can't we all just stop...
The problems can't be solved and
The problems wont be solved,
Until we realize that all this has to stop)2x

CHORUS: Just one more time, wish i could go back
through all this, rid the world of all its problems, and
i've never had this wait on my shoulders, like im
leading a generation on

What have we succumb too?
it's never been like this before,
And i'm really scared this time.
Are we going to die?
This isn't how its suposed to be,
And somehow i feel like its upto, up to me
Step back in the light
The Holy Grail is just out of reach and
I think i just might
Take a leap and see if i make it,
Step back in the light
The Holy Grail is just out of reach and
I think i just might
Take a leap and see if i make it,

CHORUS: Just one more time, wish i could go back
through all this, rid the world of all its problems, and
i've never had this wait on my shoulders, like im
leading a generation on ON ON ON (lets go)
