Bye Bye baby  
Bye Bye baby fly away  
Past the horizon far away  
I will miss you

I believe you when you say  
We will reunite one day and it won't be long  
But will soon be soon enough  
Will distance strengthen our love

Cos I I can imagine spending my life with you  
And that doesn't happen all that often  
I could easily handle spending my days with you  
And that could be enough to see me through

Bye Bye baby fly off to a distant shore  
To live the life you had before  
Just remember me And I'll wave good bye but not let go  
I will hold onto the hope that you will return  
But will soon be soon enough  
Will distance strengthen our love

Cos I can imagine spending my life with you  
And that doesn't happen all that often  
I could easily handle spending my days with you  
And that could be enough to see me through

But will soon be soon enough  
Will distance strengthen our love  
But will soon be soon enough  
Will distance strengthen our love

Cos I I can imagine spending my life with you  
And that doesn't happen all that often  
I could easily handle spending my days with you  
And that could be enough to see me through

Baby I Baby I love you  
And that could be enough to see me through  
And that could be enough to see me through
