We won't sleep

Oh, let's go!

This is for the best

So I think it's safe to say,
I can not live a single day without you
Not around you,
I've got to find something new to do

And in your absence I simply could not be
Can't you see that my entire existence
Depends on your presence

This presents a constant problem I can't fix,
And just won't comprehend some people's intentions to
quit
The light of day is gone, each time you take so long
To map the whole world back to sing your song
(Now sing along)

We won't sleep
Until we feed the need

And in your absence I simply could not be
Can't you see that my entire existence
Depends on your presence

Oh

The light of day is gone, each time you take so long
To map the whole world back to sing your song

We won't sleep
Until we feed the need
(Sing your song)
