"The Body Is Me"

Visit "[The Body Is Me](#)" on MotoLyrics.com

There's nothing inside, no mind
no spark of consciousness
just the body the way it is
a body eternal
- The body is me -
The body we all know is what it is
but the mind claims to be the origin
from which everything erupts, that is alive
the be all the end all and energy itself. Ha!
- The body is me -
Here I am -
You make us sick, Plato
and you Socrates, Epicurus, Kant and Descartes
I say: there is no mind without body
no mind without body, Socrates
no mind without body, Epicurus
there is no mind without body.
- The body is me.
