Earthbound wingless dream child born to necessity  
Tied to crimson velvet wings (she flies)  
New moon midnight star, medicine is in the jar  
Headful of going far, (she flies)  
Lost out on the dream road  
Looking for a keyhole  
Never try to fight it, feeling right inside it...

Low country blushing bride blind to the ways of time  
Clear crystal burning mind, (she flies)  
Falling through liquid air with music everywhere  
Stone faces silent stare, (she flies)  
The old guard on the hill can feel the chill  
Deep into the freeze of those who don't believe

[Chorus:]

Been a long time (Waiting on Love) [4x]

Damp with this morning dew the world is bright and  
new  
Her word is always true, she flies  
Step into the new day right over the old way  
We are the horizon see our future smilin'

[Chorus:]

Been a long time (Waiting on Love) [4x]

Lost out on the dream road  
Looking for a keyhole  
Never try to fight it, feeling right inside it...

[Chorus: Two times to end]

Been a long time (Waiting on Love) [4x]
