Look at the sky 'cause It's turning red  
Nothing to do we shall be dead  
The push of a button Apocalypse can begin  
Why do we have to die for others to win  
You made your bomb as you preached for peace  
When will hipocracy ever cease  
I won't fight for expression of your hate  
It is your bomb and it's your mistake

Many millions who died during the wars  
Many mutations and horrible scars  
Those who lived the pity holocaust  
Living reminders of warefare's cost  
We know the ones who started all  
We gave them power and now we'll watch them fall

[chorus]

R.G.S.O.T.  
Take away our hard working green  
R.G.S.O.T.  
To make the most powerfull machines  
R.G.S.O.T.  
Who gives a damn if you win or lose a war  
R.G.S.O.T.  
Like things are marching the end is not far

Nobody got the right to take our lives  
How can we make peace with such a threat in mind  
They are leading us to the abyss  
Tell our rulers they can sit on this  
They think the world is theirs to do what they want  
About the people they really don't give a fuck  
They cheer for victory death is for us  
Lets waste the bastards nail'em to a cross

[chorus]

[solo]

Written on the walls are the names who fell under their  
seige command

Nobody can erase them but have dared to forget the  
mortal men  
What about the people who await their family to come  
back  
They suffer for reasons that nobody can or will  
understand  
Until they experience the loss of flesh and blood  
That's what we have to do so we can be the country's  
sons

The maniacs who killed humanity  
They won't even die of insanity  
They force you in with persistence  
Like the choice you have for existence

It's only a life we lose  
Only a life we lend  
You can always make another one  
It's only a life my friend

[chorus]
