Alright

You've got a whole lot of trouble

Running in your veins

Say it right here, right now

You give drugs a bad name

So while I just hit him

You can hang him high

Why just make them sweat

When you can watch them die

If you'd have faced the world

You could have had it all

Now your back's up against

That same damn dirty wall

Every place you live

Turns out the same

You passed your last buck

You give drugs a bad name

You give drives a bad name

You give drugs a bad name, baby

Yeah, yeah, alright

Yeah, hey

Now a cool person knows when the party ends

Besides some of us just might want to get

Invited back here again

So pick yourself up off that bathroom floor

Take whatever pill helps you find the door

For all the people you just let down

You can pay us back by never coming 'round

And until that day, that'll never be

Just don't tell anyone you came here with me

You give drugs a bad name

You give drugs a bad name

You give drugs a bad name

Baby, yeah, yeah, yeah, yeah, alright, come on

Drugs got a bad enough name as it is, baby
