I can see July fourteenth in my mind  
The softness in your eyes  
I can taste your sweet lips against mine  
Your sweet sixteenth

The candles in the background  
Fireworks in the sky  
We're dancing around  
Our summer together, the last till we fly  
The last till goodbye

[Chorus]

Your sixteenth birthday dear  
I was there, you were here  
We knew what was coming  
We swore we were gonna run  
Before the night was done  
That never happened, we said goodbye  
We saw the last night  
The end of the sweetness

[2nd Verse]

I can still feel you with me  
I can feel you breathe  
I feel your grace  
See your face  
Put myself in that place

I swear that one of these days  
I'll be able to say  
That we ended up together anyway  
But I'll never forget

[Chorus]

Your sixteenth birthday dear  
I was there, you were here  
We knew what was coming  
We swore we were gonna run  
Before the night was done

That never happened, we said goodbye  
We saw the last night

The end of the sweetness

[Bridge]

The sky is a rosemary color tonight  
Iâ€™m thinking about our last fight  
You were telling me to stay here  
You said, follow your dreams dear  
Donâ€™t let me hold you back  
But all I wanted to do was be with you  
Oh and now all we have left is

[Final Chorus]

Your sixteenth birthday dear  
I was there, you were here  
We knew what was coming  
We swore we were gonna run  
Before the night was done  
That never happened, we said goodbye  
We saw the last night  
The end of the sweetness

[Final Verse]

Everything in itâ€™s reverse  
Youâ€™re gone living your dreams  
Without me  
Iâ€™ve been living everyday with the hurt

Iâ€™m dealing with the pain of losing you  
To get what I want in life  
Doing what I have to  
To make us both happy in our own right  
Our own right  
I miss you dear
