Dark and hollow  
Freezing as ice  
Eternity  
Of emptiness

After long years of waiting  
Emptiness arrives  
Now she is the only one here  
She has no death or birth

How do you change emptiness  
How do you change what doesn't exist  
And whatever it's bigger and bigger  
Pretty she soon will be the only one left

Clouds float in the sky  
Rivers fall into oceans  
Day switches night

Seasons substitute each other  
Autumn leaves and winter comes  
And it snows

Maybe some day things will be different  
Emptiness will stay away  
Or it will disappear

But now there is only  
Gray cold skies on high  
And it snowing
