Living in this world alone, without you, I'm losing my mind.

Living with these shadows above me all the time.

Oooohh, getting worse with time.

I only wanna be with you, be with you forever, for all of my life.

I only wanna be with you, be by your side. I can't help but love you.

And I want you. And I miss you. And I love you.

Please come back to me. Come back to me 'cause I still love you.

Ever since the day you left, all I do is sit here and cry.

The walls are crashing in around me, but I am frozen.

I'm frozen in time.

I only wanna be with you, be with you forever, just like old times.

I only wanna be with you. Oh, I miss you. Oh, I miss you.

And I want you. And I miss you. And I love you.

Please come back to me. Come back to me 'cause I still love you.

Come back. Come back to me. Come back to me. Come back to me.

Come back to me. I still love you.
