Close the door
Not all the way
We don't understand
We don't understand
So don't you go and remind me
I don't know a thing
And some of us remember
And some out of place

Can I wait for you down little December
Can I stand in your light just for a while?
I've waited around to..
I made up more time watching you.

You got it down now, don't you?
I wanted to understand your face
So don't you go and remind me
I don't know a thing
And some of us remember
And some run out of place.

Can I wait for you down little December
Can I stand in your light just for a while?
I've waited around to..
I made up more time watching you
Watching you.
