"Together Burning Bright"

Visit "[Together Burning Bright](#)" on MotoLyrics.com

Feel the pain wash over me
Feel the salt that's burning from my eyes
I feel the world move underneath me
I know there is no need for my disguise
Feel the screams as you take my hand
I understand the terror in your eyes
Feel I've lost myself completely
I need to know you're right here by my side
I won't pretend that we could live forever

(Chorus)

I think it's going to be alright now
I think it's going to be okay
Just close your eyes
Cause we are only sparks
But together burning bright

I see the daylight start to fade
I feel the cold move softly with the night
I feel the darkness stop to take me
Now I know there is nowhere to hide
Feel the world start caving in
I feel the hollow nothing left inside
I know I've lost myself completely
I need to know you're right here by my side
I won't pretend that we could live forever

(Chorus) x2

Yeah together burning bright
We are only sparks
But together burning bright

I won't pretend that we could live forever

(Chorus)

I get the feeling it's alright now
I get the feeling it will be okay
Just close your eyes
Cause we are only sparks
But together burning bright

(Chorus)
