Without you I'd be a bitter soul  
But when I come home you're sitting there you're  
smiling  
How do you see the brighter side  
The better life you dream for you and I

You said don't waste your time worrying  
To give every moment meaning

You are the one that I can count on  
You are the one that I needed  
I don't think I ever would have known how good I have it  
You are the one that I can count on

How do you know when to let go  
When the whole world tries to tear you apart  
Without you I'd be alone in this world  
With nothing to look forward to  
No one to hold

Thank you for making it easy  
Thank you for learning to love me  
Without you I'd be someone else  
Thank you for making it easy  
You are the one that I needed
