Decapitate
Feast on your flesh
Now feel my blade you are no longer whole
Ripped apart you are no longer whole
You took your life for granted now I'll take it away
Mutilate
Tearing away at will I separate skin from bone
But I will not end this because you've fucked me over
one too many times
Spilling your blood at my leisure fuck you
Pissing over what is left of your corpse
Spilling your blood at my leisure fuck you
Pissing over what is left of your corpse

I lacerate your flesh
Fuck
Bodily fluids flow freely as I rip cut and tear Repetition
of killing
Genocide of the human race my final mutation has
come
You face the darkness annihilating the pure to
dominate again
Take back this ancient planet this land belongs to me
Your earth a desolate shadow of it's former state
of it's former state
Fallen human filth I will show no mercy
Planet fucked
A hole in space embryonic waste
