I Will/ With You

give me another
piece of your heart
splinter it slowly
things fall apart

dig in the garden
dirty your knees
with flowers forgotten
and old linden trees

remember for me
remember for me
remember for me
remember for me

corner the quiet
that covers the sound
whispers you ran from
and time ran around
tears on the floorboards

remember it now
remember it now
remember it now
remember it now

and i will
with you

remember it now
remember it now
remember it now
