Light in your candle  
It's pulling me down  
Facing the cracks that you leave behind  
Lost in the memories of what has been  
Night as all you colds within...

Like a shoulder you been shut to the ground  
You wil surrender and all yuou need to know is  
Don't be afraid of the dark  
Be afraid of the dark  
And you'll never be alone  
There's a star in the sky that will guide you on

Many mistakes die I have undone  
But lots of laughter lots of fine  
Holding you closely
