"The Axis"

Visit "[The Axis](#)" on MotoLyrics.com

Follow me down little darlin'
Won't you keep your style, you keep your grace
Break down these walls we've put between us cause
Cause you're the only one who puts me in my place

Let's break these molds, let's fight these demons
We can show this whole world that we don't need their
help
You and I both know just how we're feelin
So don't worry about history repeating itself

If I fall down
This ground will surely catch me
All around the sky is caving in
Far away
I know that you'll be waiting
Waiting in the end

You catch my drift pretty baby

Understand that time is of the essence now
We try so hard, but if we fail
We can just turn around, walk away, take another bow

If I fall down
This ground will surely catch me
All around the sky is caving in
Far away
I know that you'll be waiting
Waiting in the end

The axis spins, the oceans wash away
The mountains crumble, rest beneath the sand
Then there you are just contemplating
Waiting for me to come and hold your hand
