Get in your mind that nothing is like what it seems,
It's not a great time to move your eyes from what is
real.

Mirrored inside, your fears got to debut tonight:
a really big screen where your life was being lived in.

Thrusting all night on some kind of devotion that will
make us have fun,
Let's take it to the next degree.
Seek and you'll find a city filled with blinding lights,
Where poisonous beats make you dance without no
meaning.

[Chorus]

Feed up the strife, my headache and the baseline,
They go on and on, it's like I'm in a horror film.
Tease and unwind, and once you've lost it there's no
turning back on this track with no place for any
comeback.

Twitch in your eye, at this point you'll be breathing
madness,
No one will cry, it's sometimes really hard to deal.
Flashing all lights, with fractal glow and soothing vibes,
The echoes inside of your mind are not the same now.

[Chorus]

Too fast too slow I'm following someone to the end, I'm
following someone to the end.(x4)

Let's get this people dancing!
