The nights were dark and long I've spent a million all  
alone  
But I never once stopped loving you  
My world was cold and still my dreams lay unfulfill  
But I never once stopped loving you  
I never once stopped believing we'd love again the way  
we used to do  
And today when you came back my patience was  
rewarded  
For I never once stopped loving you  
[ guitar ]  
I could have loved another but I chose the way and  
suffered  
For I never once stopped loving you  
And I prayed to God to guide you till I could be beside  
you  
And I never once stopped loving you  
No I never once stopped believing...
