"Safe"

Visit "[Safe](#)" on MotoLyrics.com

Here's a surprise and I was not prepared
But these are my eyes and you are standing there
And here is a wish that I forgot to make
And here is a kiss to take the pain away
She said keep your arms around me
Just keep your arms around me
Cause I know it's late
This is where I'm safe
This is where I'm safe

Here is a heart that beats a little fast
This is the part where we start making moments last
And here is the hope I know we'll never break
And here is a kiss to take the pain away
She said keep arms around me and it'll be okay
It'll be okay

Cause I'm coming to California, I'm going to L.A.
Don't say I didn't warn ya, cause I'm going there to stay
And feeling lost in Boston
And Philly needs a rest
It's never simple in New York City
So I'm better off out west
So I'm coming to California
Yes, I'm coming to California

And here is a plan that I will follow through
I don't understand what has been keeping me from you
And here is the love that I forgot to take
And here is a kiss to take the pain away
She said keep your arms around me
Just keep your arms around me
Cause I know it's late
This is where I'm safe
This is where I'm safe
This is where I'm safe
This is where I'm safe
