Visit "[Where I Come From](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Undecided, never sure of where you want to stay  
Never making choices, you don't know no other way

Where I come from  
We believe in what we say  
Where I come from  
We believe in what we say

Waiting for a signal that will tell you where to go  
What you got inside you is all you need to know

Where I come from  
We believe in what we say  
Where I come from  
We believe in what we say

Take a chance just let it take you  
You'll never be the same  
World's shining all around you  
Walk in to the flame

Undecided, never sure of where you want to stay

Afraid of making choices, afraid you'll have to pay

Where I come from  
We believe in what we say  
Where I come from  
We believe in what we say

Take a chance just let it take you  
You'll never be the same  
World's shining all around you  
Walk in to the flame

Where I come from  
We believe in what we say  
Where I come from  
We believe in what we say
