You were gone before I had the chance to say goodbye  
gone long before I had the time to cry now the sun has  
the nerve to turn the hours into days and I'm still  
standing here alone in this place.

If heaven has a window to see from here to there you  
know how much I miss you and how I still feel you near  
closer than a wisper like the sun rise on my skin a  
perfect living picture and I'm with you once again  
you're there everywhere I go but then you already know  
if heaven has a window.

Summer long I feel near close against my side strong  
when the autumn leaves turn away the time I look to  
were you once where there and I hear you start to  
laugh and I wonder how long this pain is going to last.

If heaven has a window to see from here to there you  
know how much I miss you and how I still feel you near  
closer than a wisper like the sun rise on my skin a  
perfect living picture and I'm with you once again  
you're there everywhere I go but then you already know  
if heaven has a window.
