[Verse 1:]

We built it like a castle of sand  
And we held it in the palm of our hands  
Never let it blow away in the wind  
Or we'd catch it, put it back together again

[Pre-chorus:]

And I still don't  
Remember life before  
You came inside  
And opened up that door  
You're an angel I've  
Never known a love like yours  
Something special that's for sure

[Chorus:]

Cause I stay up late night and wait for your call  
When I hear your voice nothing matters at all  
Girl, I got no choice I just can't help but fall for you

[Verse 2:]

When my phone rings  
And you're dialing my number I can't breathe  
So don't ever wonder if this thing  
We got going is stuck in a daydream  
Cause it's real to me, my baby

[Pre-chorus:]

And I still don't  
Remember life before  
You came inside  
And opened up that door  
You're an angel I've  
Never known a love like yours  
Something special that's for sure

[Chorus:]

Cause I stay up late night and wait for your call  
When I hear your voice nothing matters at all  
Girl, I got no choice I just can't help but fall for you

[Bridge:]

What we got it won't ever fade  
If we're miles apart or worlds away  
Girl, the only thing I'll ever need is you

[Chorus:]

Cause I stay up late night and wait for your call  
When I hear your voice nothing matters at all  
Girl, I got no choice I just can't help but fall for you

Cause I stay up late night and wait for your call  
When I hear your voice nothing matters at all  
Girl, I got no choice I just can't help but fall for you

[Outro:]

When you're scared and lonely just pick up the phone  
You're my one and only, you're never alone  
There is no hope for me it's too late I've fallen for you  
For you
