"Light My Way"

Locked in a shadow
Praying for release
You found my prison
Your love was the key

So come on
Light my day
And come on
Light my way

Lonely's just a word now
Something from my past
Horizon's look brighter
Loving you will last

So come on
Light my day
And come on
Light my way

The world's now my oyster
Had me marked 'Reject'
You changed the story
Gave me back respect

So come on
Light my day
And come on
Light my way
