-How you doing sweetheart? Hey uh, you know these last few months we've been together have been so right, and I'm just glad for what we've shared, I've been wondering how do you feel?

*I want t get lost in love with you and do all the things you want me to caress your body, touch you so cause boy I love you so (and I love you too baby) I want to get lost in love with you and do all the things you want me to caress your body , touch me so cause boy I love you so.

-The love we shared, something so especial estar contigo is all I want to do every night, ever since el primer dia, the first day, I new it last forever if I had it my way so the days go on. No ago otra cosa, but dream about the moments our hearts will come closet. Holding tu mano and your face tan bonita, never meet another young lady senorita, and that is why I got to say that your the best a million and one ways just to express, mi amor I know that we will be together so sing to me baby and sing forever.

*I want to be with you always, together forever till our ending days, hold me baby, don't let go making love like never before. I want to be with you always, together forever till our ending days, hold me baby, don't let go making love like never before.

-Making love in the night time, walks in romance I'm telling you hermosa my heart is in a trance. They say that true love is so hard to find, I thank the lord up above for making you mine. Talking in the telephone sending you kisses, a dozen of roses just to say that I'm missing, the wormth of your body right next to mine. Eres tu la mejor like a toast of fine wine, out to the movies maybe sharing some ice cream, si estoy dormido don't wake me from my dream. Todo lo que quiero all I need is your affection, my life was fine but you brought perfection, now we sit here, just holding hands, whispers in my ear, tell that I'll be your man

,today manana in a paradise for 2,I feel the same way
cause I'm so in love with you.

*I love the way you make me feel,my love for you is,oh
so real embrace my body,toch me softly,love till the
morning,I love the way you make me feel,my love for
you is,oh so real embrace my body,touch me
softly,love me till the morning.

-You know that love we share is just something so
special,the tenderness,I just don't know what to say
girl,would you sing to me.One more time do it like this
come on.

*I want to get lost in love with you and do all the things
you want me to caress your body,touch you so cause
boy I love you so.I want to be with you always together
forever till our ending days hold me baby don't let
go,making love like never before.
