"Bird With No Name"

Visit "[Bird With No Name](#)" on MotoLyrics.com

Empty pages there before you,
Days go down into our history
All the ways you could have taken,
There was only one that meant to me

Chorus:

Long before you ever could have known
Things would come to be this way
Now you find yourself lying alone
Like a bird with no name!
With no name, with no name, with no name!

But time lies around you
As the dawn surrenders to another day
The world goes on without you,
There's a gift to bring, just a word without a page

There's no one left to let you down
You're holding on, but...
Of the all the things you could have found,
You ended up a bird with no name,
with no name, with no name!

You made this promise to yourself
Was for you and no one else
Was no one knowing...
Your story to another...

Chorus:

Long before you ever could have known
Things would come to be this way
Now you find yourself lying alone
Like a bird with no name!
With no name, with no name, with no name!
A bird with no name
With no name!
