"Reform"

Visit "[Reform](#)" on MotoLyrics.com

It's override you
"We are now cruel beings fighting things"

Something learned
And now concerned
All is different now
Somehow
Rearranged
We face the change
Stumbling towards
But never found

Always forwards, never back
Crouch and wait for the attack
One by one we overcome
As we learn we've just begun

Only distance waits now
Only distance waits now
Only distance waits now
Put it in it's place now

I always feeling like I'm falling down

There's got to be
Another way
I lose control
And cannot stay
There's got to be
Some kind of change
I can't relate
Must rearrange

Only distance waits now
Only distance waits now
Only distance waits now
Put it in it's place now

Missing in it's absent state
One point left to recreate
Start from scratch and now rebuild
'Til the emptiness is filled

There's got to be
Another way
I lose control
And cannot stay
There's got to be
Some kind of change
I can't relate
Must rearrange

Only distance waits now
Only distance waits now
Only distance waits now
Put it in it's place now

Only distance waits now
Only distance waits now
Only distance waits now
Put it in it's place now

There's got to be
Another way
I lose control
And cannot stay
There's got to be
Some kind of change
I can't relate
Must rearrange

There's got to be
Another way
I lose control
And cannot stay
There's got to be
Some kind of change
I can't relate
Must rearrange

I always feeling like I'm falling down
(There's got to be
Some kind of change
I can't relate
Must rearrange)
