Girl, just a moment is all we need  
Let me take you, take you there  
When the rain starts to fall  
So here, lost in your eyes I can't see  
Feelin' your body, talk to me

We lay, flow like a river move as one  
In the heat of a summer night  
Stay, let me whisper no one else could ever love me

When the rain's comin' down, I wanna make love  
When the rain's comin' down, gonna make you feel  
good now

Wait all of your lifetime for someone and baby it's you  
I'm afraid I can't let you walk away  
Something's so right this time

When the rain's comin' down, that's when I want to  
make love  
(I wanna make love) When the rain's comin' down  
(When the rain's comin' down) Don't it make you feel  
good baby

(When the rain's comin' down, I want to make love  
When the rain's comin' down, that rain's comin' down  
I want rain, I want to make love)
