Scream At The Sky lyrics

There's a question but no answer
Why the hell i have to die in cancer

I scream at the sky
With this question why
Why i have to die
please tell me why

My sister is a psychic case
My brother lives life in terrible ways
There's a question that i wonder
I went up six feet under
I scream at the sky
With this question why
Why i have to die
please tell me why

Now i'm dying, slow and terrifying
There no cure, but there's a light
To take a suicide, isn't to fight

I scream at the sky
With this question why
Why i have to die
please tell me why
