We offer you the key to your spirituality  
The answer that links us to our eternity  
The difference that's a lie between yourself and all you  
see  
But this does not convince you, you lust technology

Unite the earth

Gods have failed us all along it was a farce  
And all along you knew but refused the help of visitors  
A concept that would boom higher intelligence  
Was kept a secret from us for a minorities profits

But praising God won't save the world  
Only praise of human kind

You close your eyes and place demise  
This forgotten entity  
Fabricated stories, protect your former glories

Time is soon at hand  
They covered, you'll be revealed  
Exposing your whole lifestyle  
Nothing but a lie

Galactic intervention  
Dimension intervention  
Galactic intervention  
Dimension intervention
