Yo Yo,  
Check This,  
Yo

Leave you stiff like a cat puffin coke and weed in a  
spliff  
Nose broken bleeding, dripped away as they lift you on  
a stretcher rip  
Images of organ incisions gets ya sick  
while you puke up what you chewed up, now chew up  
what you threw up  
Left in the morgue, full flesh for a dog,  
funeral organs rock a morgue pin C clef to a chord.  
You're wheeled away now every day your flesh'll peel  
away,  
sever decay maggot infest rot drag then dropped in a  
plop forever slayed, slide  
you inside the cremation chamber  
the system of erasing your existance with the flames of  
nature  
free basin angel dust is danger, euthanasia  
methods of death stranger than the sounds of a  
flanger,  
burnt to a carcass i watch the fire sparkle then i deliver  
your family a parcel  
filled with charcoal.  
a neurosurgeon you're regurgitating detergent  
i urge you to worship your on the verge of becoming a  
servant,  
there's no physical evidence you existed when your  
ashes get pissed on,  
no one remembers A bitch kid, i determine you'll be  
eaten by vermon, german  
cockroaches squirm through you,  
locusts and worms in your skin

We're living in a world gone mad, a crazy world , the  
world where death is the  
way of life, every day we read of atrocities that numb  
the brain, but i believe  
to deny what is insane. or to try to flee from it is to  
submit to it, to be at

the mercy of it when you should just study it, to enjoy  
life, chill with me as  
we descend into the world gone mad, a world of dying  
and killing sprees

your dead and you'll never come back, you got  
murdered by a scumbag,  
the type that doesn't realize that he's done bad,  
he's walkin' the streets free while you're six feet deep,  
police close the case 'cause there's no trace, you're  
beat.

i'd write a verse on your toe tag, you get suffocated  
with a bag  
over your face, you'll gag with no air ventilated,  
i'd rock a mask for the stench of rotting corpses does  
not smell like a box of  
chocolates

your cadaver is packaged in suitcases and travel  
baggage

then buried under gravel in secluded places,  
i got an appetite for abduction, we kidnap women,  
torture them, brainwash them  
and fuck them.

I'm a carnivore, my teeth are sharp made for ripping  
flesh like blades to carve  
through body parts

We're living in a world gone mad, a crazy world, the  
world where death is the  
way of life, every day we read of atrocities that numb  
the brain, but i believe  
to deny what is insane. or to try to flee from it is to  
submit to it, to be at  
the mercy of it when you should just study it, to enjoy  
life, chill with me as  
we descend into the world gone mad, a world of dying  
and killing sprees  
\*(repeat)\*
