Did you ever feel
On just any day
You wanna say I love you
But you just walk away

Did you ever know
What's inside your heart
It's something called love
But it sometimes falls apart

Did you notice when
Your fights go overboard
You loose control
But you don't care anymore

The fights
The bets
The old regrets
Tell me how can I forget

The dares you take
The hearts you break
The rate gets bigger every day

I never said I missed you
But I never said I didn't

I never said I did do (that)
But I never said I didn't

Situation overboard
Lost control can't take no more
You got my head just spinnin' (spinnin')
Since you got me thinkin' (thinkin')
I'm just another one of them
