I've got a friend, her name is Laura
We took a holiday, seven sweet days in Mallorca
We took a plane, through to Southern Spain
To see the ocean wave's blue
We sat and watched the moon
As crickets sung back cover tunes
Way back in May
Seven days in the sun, seven days in the sun
She's my heaven, she's a spark (yeah yeah)
Feels like heaven - so light me up
She's got this friend
Who's name is Paula
He likes to cross dress every Friday night
In clothes from Prada
We took a train, left behind the rain
To see the summer sunset glow
But now she's not around
I'm hanging on with broken hands
Way above the clouds
Seven day in the sun, seven days in the sun - sun
She's my heaven, she's a spark (yeah yeah)
Feels like heaven - so light me up
You really light me up - You really light me up
You really light me up - You really light me up - You
really
Staring through the crowd, it's pulling me underground
And who's gonna dig me out
We used to take a walk, on velvet sands across the
beach
We used to build a fire, and stare into the rising heat
You used to set me free, lift me from the concrete sea
Seven days in the sun
She's my heaven, she's a spark (yeah yeah)
Feels like heaven, so light me up
You really light me up - You really light me up
You really light me up - You really light me up
You really light me up - You really light me up
You really light me up - You really light me up
You blow my mind
